

### Acne - Good

Explanation: Acne is caused by clogged pores, bacteria, and excess oil production.

Suggestion: Use a gentle salicylic acid wash and consult a dermatologist.

### Blackheads - Good

Explanation: Blackheads form when pores are partially clogged with oil and dead skin cells.

Suggestion: Try chemical exfoliation with BHA (salicylic acid).

### Dark Circles - Good

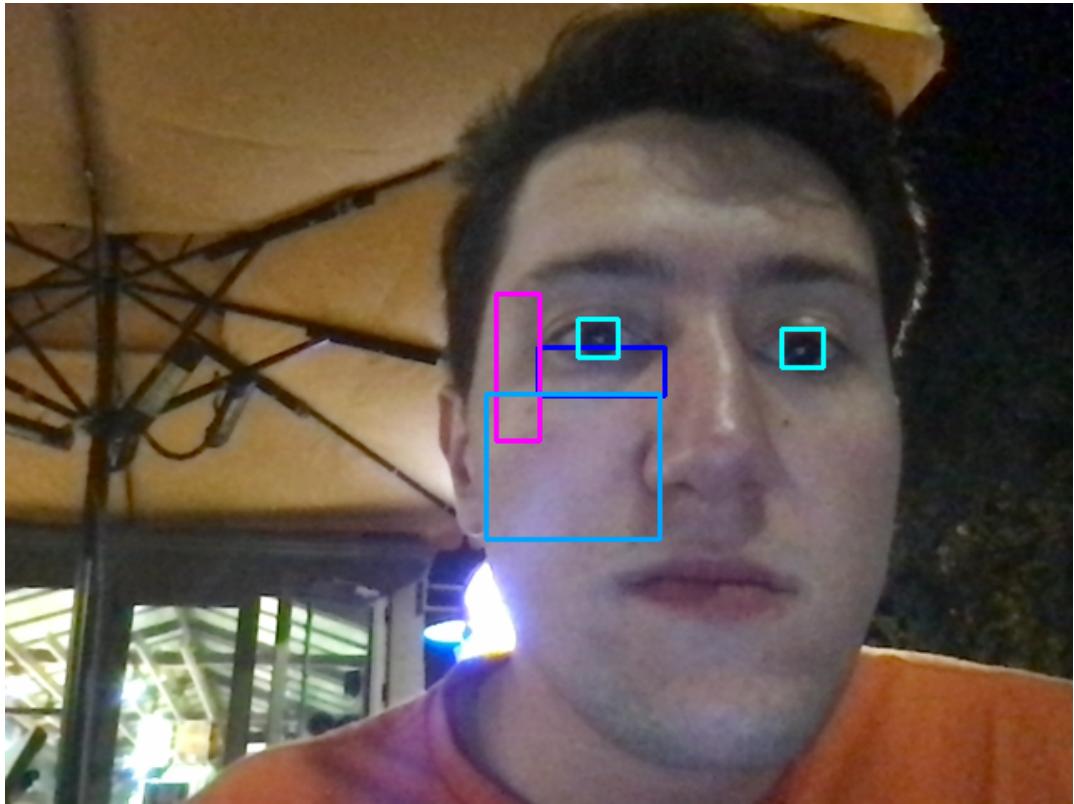

Explanation: Dark circles can be due to genetics, thin under-eye skin, or hyperpigmentation.

Suggestion: Ensure sufficient sleep and use cold compresses.

### Pigmentation - Good

Explanation: Pigmentation irregularities arise from melanin overproduction, triggered by sun exposure.

Suggestion: Apply daily SPF 30+ and use topical lightening agents.

### Wrinkles - Good

Explanation: Wrinkles develop from loss of collagen and elastin over time.

Suggestion: Incorporate retinoids at night and protect skin from UV.

### Pore - Neutral

Explanation: Enlarged pores result from genetics, oiliness, and loss of skin elasticity.

Suggestion: Use clay masks weekly and oil-control primers.

### Redness - Neutral

Explanation: Redness can be caused by irritation, inflammation, or vascular issues.

Suggestion: Choose fragrance-free, soothing products.
